NEW FROM PRINCETON

Brahms and His World
Edited by Walter Frisch

Unlike some recent volumes on Brahms, which have served mainly to bring together miscellaneous papers read at conferences, this collection seeks to locate the composer more directly in the context of his personal, professional, and musical environment.

The volume consists of three parts. In Part I essays by six prominent scholars explore different aspects of Brahms's relationship to his world. The topics include time, memory, and concert life in Brahms's Vienna (Leon Botstein); Brahms's complex personality (Peter Ostwald, M.D.); Brahms and Clara Schumann (Nancy B. Reich); Brahms and the New German School (David Brodbeck); Brahms's pianos (George S. Bozarth and Stephen H. Brady); and Brahmsian influences on his contemporaries (Walter Frisch).

Part II presents commentary on Brahms's music culled from some of the most important critics of the nineteenth and early twentieth centuries. Most of this material has never appeared in English before. Included are excerpts from the earliest published survey of Brahms's works, written in 1862 by Adolf Schubring; reviews by the powerful Viennese critic Eduard Hanslick; and analyses by Hermann Kretschmar and Donald F. Tovey.

Part III offers substantial portions from memoirs about Brahms. These excerpts, most translated into English for the first time, are taken from Hanslick and from the composers Alexander Zemlinsky, Karl Weigl, and Gustav Jenner.

Music and Discourse
Toward a Semiology of Music
Jean-Jacques Nattiez
Translated by Carolyn Abbate

Jean-Jacques Nattiez, well-known for his pioneering work in musical semiology, examines both music and discourse about music as products of human activity that are perceived in varying ways by various cultures. Asking such questions as "what is a musical work" and "what constitutes music," Nattiez draws from philosophy, anthropology, music analysis, and history to propose a global theory for the interpretation of specific pieces, the phenomenon of music, and the human behaviors that music elicits.

Studies on the Origin of Harmonic Tonality
Carl Dahlhaus
Translated by Robert O. Gjerdingen

Carl Dahlhaus was without doubt the premier musicologist of the postwar generation, a giant whose recent death was mourned the world over. Translated here for the first time, this fundamental work on the development of tonality shows his complete mastery of the theory of harmony. In it Dahlhaus explains the modern concepts of harmony and tonality, reviewing in the process the important theories of Rameau, Sechter, Fétis, Riemann, and Schenker.

Psychoanalytic Explorations in Music

Edited by Stuart Feder, M.D., Richard L. Karmel, Ph.D., and George H. Pollock, M.D., Ph.D.

“Psychoanalytic Explorations in Music investigates composition, performance, and listening through the singularly illuminating prism of psychoanalytic psychology. As a biographer of composers, I use that same prism in my effort to connect my subjects’ lives — both past and present — with how they put notes together in a score. But this volume should also prove useful to those whose interests differ from my own, for its essays touch on all of aesthetics in a genuinely original and nourishing way.”

— Joan Peyser

TERCENTENARY ANNOUNCEMENT
1690-1990

FRANÇOIS COUPERIN

COMPLETE ORGAN WORKS
(2 Organ Masses)

revised by
KENNETH GILBERT and DAVITT MORONEY

1990 marks the Tercentenary of the first issue of Couperin's Organ Works (the Privilège is dated 2nd September 1690). This revision of the classic 1933 l'Oiseau-Lyre edition retains Grandjean's beautiful engraving, and adds extensive prefatory material. These two Organ Masses have long been considered the pinnacle of the French Classical Organ School.

Price : 230 FF
